February 2023 Release Notes - 3.8.0

Creating an Alert - PVQ - 149, 150

Digital Configuration Studio

Enhancement! Previously, the user could only schedule an alert or subscribe to the alert in edit mode. Now user can schedule the alert and subscribe to that alert while creating the ticket.

Ad Hoc Report Changes - PVQ -59, 410

Reporting Studio

Enhancement!

In Ad Hoc reports, the limit of records visible to clients has increased from 1000 to 5000 for 30 days. Users can now view a max of 5000 records on the Ad Hoc report.

AS2 storage sends the last step fix PVQ-215

BACKEND

New! User can now use the following functions on intermediate steps:

- SFTP Send
- Storage Send
- SQL Send
- MQ Send
- HTTP Send

This will allow users to route the same files to multiple locations under the same flow.

Add Release Notes information - PVQ - 462

Customer Portal

New! The user can view the list of all release notes and the details of upcoming releases. The release export option will be available on the articles page.

Download Mapping from Mapping Screen - PVQ - 310

Map and BRE

New! Download File functionality is added on the mapping screen.

Search criteria on Cross Reference Schema data - PVQ -69

PartnerLinQ

Enhancement! Previously search criteria were not available on Cross Reference Schema data. Now Search on Cross Reference Gird is added for enhanced user experience.

Cosmos Database Configuration Screen PVQ, 364, 346,

PartnerLinQ

New! Added new Integrations for Cosmos Database. This will allow for pulling or pushing data to a Cosmos database within the process flow.

Observe "View Profile" PVQ-577

Customer Portal

Enhancement! View Profile in Customer Portal will show User information in the Popup upon clicking. Users will be able to edit their information.

Bug Fixes

Fix! Multiple fixes have been done throughout the PartnerLinQ, including the following:

- **PVQ - 451;** Partnership process-flow back button redirect issue is fixed. Now page redirects to 'Add New Partnership' instead of Partnership List Page.
- **PVQ- 361, 474;** Switch environment option is removed from the User settings menu. Users can use the environment information button at the main header to switch to a different environment.
- **PVQ- 273;** Partner Column Width Adjusted to match Outbound transaction screens.
- **PVQ - 280;** From the outbound screen, the user was unable to download the pdf, and also, on the view icon, it is prompting view is not supported. Now user can view the PDF.
- **PVQ - 289, (Internal Only)** Sensitive information such as connection string and topic name will not be visible on process flow step details.
- **PVQ - 244;** Added step name information in the file name while downloading the file from step.
- **PVQ - 280;** Search Added on Partnership selection on custom alerts screen.
- Certificate segregation according to company id.
